

Dear Review Committee,

We sincerely thank the reviewers for their valuable feedback and detailed comments on our initial submission. We have carefully considered all suggestions and made comprehensive revisions to improve the clarity, completeness, and overall quality of our paper.

Specifically, we have:

- Expanded the description of our dataset, including detailed information on its construction, annotation process, and key statistics, now fully included in the main text.
- Clarified the experimental setup by providing comprehensive details on training procedures, evaluation protocols, and model configurations.
- Ensured that all critical information is contained within the main paper, complying with the ARR guideline that the paper should be self-contained without relying on the appendix.
- Transitioned our submission to the long paper format to accommodate the necessary detail while maintaining readability.

We believe these revisions significantly improve the manuscript and make it more accessible and transparent for evaluation. We look forward to your further consideration.

Thank you for your time and guidance.

Sincerely,

[Anonymous]
